

INVERTED BUCKET STEAM TRAPS IB12

DESCRIPTION

The IB12 series inverted bucket steam traps are recommended for applications where the most important requirements are overall operating efficiency and long, trouble-free service life.

They operate intermittently, either wide open or tightly closed and are, therefore, best suited for medium and high steam pressure applications.

Connections are female screwed for horizontal installation.

Intermittent discharge.

Discharges condensate at steam temperature. Unaffected by water hammer and vibrations.

Easy to maintain.

USE: Saturated and superheated steam.

AVAILABLE

MODELS: IB12-4; IB12-8; IB12-12.

SIZES: 1/2" to 3/4".

CONNECTIONS: Female screwed ISO7/1 Rp (BS21).

Threaded flanges on request.

INSTALLATION: Horizontal installation.

See IMI - Installation and Maintenance

Instructions.
