

Vacuum breaker safety valve

Model 795

The valve acts as an automatic regulator of pressure drops and prevents the creation of a vacuum inside pressurised installations or vessels. In compliance with the ATEX 2014/34/EU directive "Protective equipment and systems for use in potentially explosive atmospheres".

Specifications

- Activated by direct action helicoid spring.
- Simplicity of construction ensuring minimum maintenance.
- Internal body designed to offer favourable flow profile.
- Soft seals giving greater tightness than that required by EN 12266-1, as long as the valve, in non operating conditions, is under equal or greater pressure than atmospheric pressure.
- Great discharge capacity.
- All the valves are supplied sealed at the set depressurising requested, simulating operational conditions, and are vigorously tested.
- All components are numbered, registered and checked. If requested in advance, material, casting, test and efficiency certificates will be enclosed with the valve.

IMPORTANT

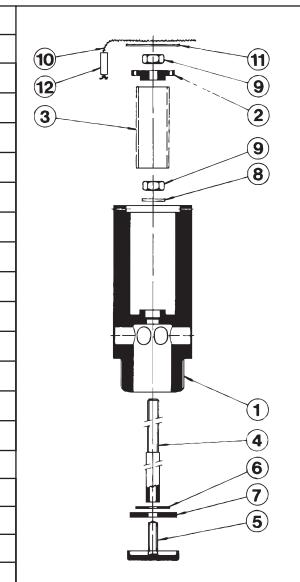

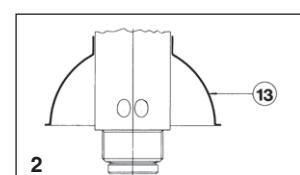

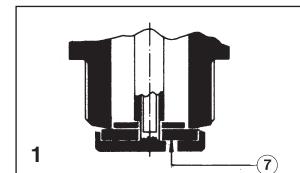

- 1.- Fluorelastomer (Viton) seals or Silicone's rubber, achieving leakage levels less than:

$$0,3 \times 10^{-3} \frac{\text{Pa cm}^3}{\text{seg.}}$$

as long as the valve, in non operating conditions, is under equal or greater pressure than atmospheric pressure.

Depending on demand:

- 1.- Buna-nitrils seals, Butyl, Natural rubber, E.P.D.M., Chlorosulphonate polyethylene (Hypalon), Neoprene, ...etc.
- 2.- The intake deflector prevents the entry of foreign bodies in the valve which will affect later operation. (Specially designed for moving transport).
- 3.- Possibility of manufacture in other types of material, for use in special working conditions (high temperatures, fluids,... etc.).

	MAXIMUM TEMP. IN °C	120	150
	MINIMUM TEMP. IN °C	-50	-50

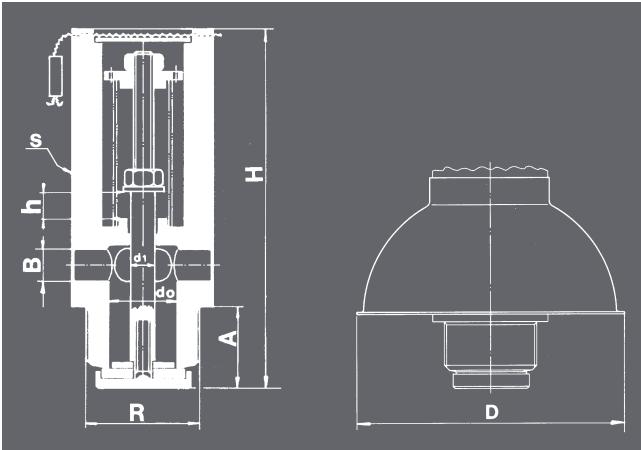

(1) For temperatures upper 150°C special seal. For temperatures upper 300°C special seal and spring.

(2) Recommended temperature field -30°C to + 150°C. Maximum pressure of service 12 bar.

(3) Recommended temperature field -50°C to + 115°C. Maximum pressure of service 9 bar.
