

STEEL PIPE - GRADE B

Technical reference data based on the supplied dimensional table

Dimensions

Nominal size (inch)	Outside diameter (mm)	Wall thickness (mm)	Weight (kg/m)
1/2	21.34	2.65	1.23
3/4	26.67	2.65	1.59
1	33.40	3.25	2.46
1-1/4	42.16	3.25	3.17
1-1/2	48.26	3.25	3.65
2	60.33	3.65	5.17
3	88.90	4.05	8.64
4	114.30	4.76	12.40

Selection notes

The commercial designation "Grade B" shown on the supplied table identifies a wall-thickness series and should not by itself be treated as a pressure rating or as equivalent to a specific pipe Schedule. Suitability for pressure, temperature, conveyed medium and service must be verified against the actual supplied pipe specification and project requirements.

Ordering information

When requesting a quotation, specify nominal size, required wall thickness, pipe length, end preparation or connection method, operating pressure and temperature, conveyed medium, quantity and any required standard or certification.

Important

Only dimensions explicitly shown under the Grade B columns in the supplied reference table are included in this sheet. Sizes not listed require separate technical verification.
